## DEPARTMENT 13 – VEGETABLES

### SPECIAL INFORMATION:

1. In selecting vegetables for exhibition, choose such specimens that would bring the highest market price. Do not select the largest – select medium sized specimens. If at all possible **DO NOT MIX VARIETIES**.
2. The following factors are generally used by an expert vegetable judge:
  - A. Trueness to variety type. If at all possible, pick the specimen from one variety.
  - B. Be sure to pick out a **perfect specimen** – then select the others as similar to it as possible and Never mix specimens of a different variety. Uniformity of shape, size, and color are important.
  - C. Protect from dirt, disease, infection, and mechanical damage. **Select specimens that are perfect and show no blemishes of any kind.**
  - D. Check condition and maturity. **Be sure that exhibits are of high quality.**
  - E. Potatoes should not be washed. Remove all soil by using a soft cloth or brush.
  - F. Tomatoes should have stems removed. Carrots, beets, etc. should have tops (leaves) removed from vegetable leaving about two inches of stem.
3. Read premium material carefully following all rules and regulations. If an entry calls for five (5) specimens, be sure to exhibit that number. Do not enter four or six. In any instance, your exhibit will be disqualified if the correct number of specimens is not entered.
4. Refer to General Rules.
5. For more information or assistance, contact Roger Homeyer at (570) 689-2024.
